

Village of Winnetka Stormwater Utility
Stormwater Utility Fee Credit Program
Form 3: Stormwater Discharge Credit Application

The following form is required of applicants applying for a stormwater discharge credit. This form must accompany the General Stormwater Credit Application (Form 1) to be considered.

General Instructions

Applicants shall complete this form in its entirety. The Applicant shall include with this application the following materials (at a minimum):

- A site survey with 1 foot contour elevations (completed within 2 years of the date of credit application), including property lines
- Identification of all impervious areas on property
- Site drainage plan, showing delineated drainage areas that discharge to receiving waters outside the Village of Winnetka and discharge points
- Copies of plans for facilities used to indirectly discharge stormwater outside the Village

Contributing Area Calculations

Impervious area on property draining directly outside the Village (square feet): _____

Total impervious area of property (square feet): _____

Portion of total impervious area draining outside the Village (% - Min 100%) _____

Discharge Credit Determination

(for Village use only)

Does the all impervious area drain outside the Village stormwater utility system? Yes No

Has the applicant provided all required documentation? Yes No

If any of the answers above is "No" the credit is denied and a letter of determination that identifies the deficiencies will be send to the applicant.

If the answers to all questions are "Yes" discharge credit is set at 100%.
