

The WINNETKA REPORT

A Message from the Village President

Dear Neighbors,

With the holidays behind us and the new year ahead, this seems a good time to review several notable accomplishments in 2025, and what to expect in 2026. After all, the naming of January purportedly derives from the Roman god Janus, who symbolically looked back at the old and forward to the new. In that spirit, we now review.

There have been many substantive issues in the Village Council queue that are being addressed deliberately and with plans of action. If I had to select a theme for 2025 and 2026 it would be "forward looking with tangible progress."

Looking back at 2025:

-Village Council contracted to secure electric power for the next several decades. In a power market filled with supply uncertainty and price unpredictability, we sought stability for our village, especially for future generations, reducing the risk of electricity interruptions (brownouts and blackouts) as demand continues to grow.

-The Council moved to advance local environmental initiatives, including work to develop a Climate Action Plan specifically for Winnetka, streamlining the permitting and approval process for residential rooftop solar installations (including waiving related permit fees for 2026), and approving a large solar installation at the Water & Electric and Public Works Yards located on Willow Road. Once completed, this system will power approximately 95% of that facility's annual electric demand and will recoup the investment in about 8 years. Our Environmental, Forestry, and Sustainability Commission is central to these local initiatives and will continue to bring recommendations to Village Council. We will have further updates about this Plan in the coming months.

-Repairs were completed to the stormwater discharge pipe at Elder Lane Beach. We remain committed to supporting the Winnetka Park District as they work toward reopening that beach this summer.

-The growing safety risks related to electric scooters, e-bikes, and electric motos were addressed. With the wellbeing of pedestrians, motorists, and users in mind, the Council adopted age and location-based regulations for these e-vehicles. You can learn more about these regulations at villageofwinnetka.org/ebike.

-The Chase Bank and One Winnetka developments are well under way and progressing as scheduled. The bank building is expected to be completed this summer, and One Winnetka anticipates residents moving in by January 2027. Many thanks for your ongoing patience with the construction disruptions.

Looking forward in 2026:

-The 2026 budget was approved in December, with several significant operating and capital initiatives prioritized. These include utility infrastructure, street rehabilitation, and public safety (police/fire). The property tax levy rose by 1.45%, roughly half the rate of inflation, and user fees, mainly directed towards infrastructure, increased from 5-8%. In short, costs are higher and the village's aging infrastructure requires ongoing attention. In the context of this backdrop, we are intent on maintaining high-quality resident services and positioning Winnetka for future success.

-This year several important issues will advance, including planning for the Post Office site, east side stormwater mitigation, Hubbard Woods streetscape, and west side stormwater conveyance (more on page 3). These are just a few priorities for 2026, and we look forward to keeping you updated on their progress.

-The business districts are thriving, with retail vacancy space below 1%. There is strong interest from the business community to locate in Winnetka, and our economic development team is active on this front.

-As was noted in the summer Winnetka Report, village government has 10 boards and commissions comprised of nearly 60 resident volunteers. At the outset of 2025, a number of incumbent terms had expired and, in addition, there were roughly a dozen vacancies. We are pleased to report that all boards and commissions are now operating at full capacity and are particularly delighted with the influx of younger residents eager to serve. The work of these groups is critical and broad resident engagement is essential.

We encourage anyone interested in serving to visit

villageofwinnetka.org/interested

In sum, your Village Council covered expansive turf in 2025 with more to come in 2026. Members of the Council are honored to serve this community and, together with our outstanding village staff, always welcome your input and feedback. Strengthening our village is a collective effort, and we are committed to ensuring that Winnetka remains vibrant and a wonderful place to live.

Wishing everyone a happy and healthy 2026!

Sincerely,

Robert H. Dearborn

Village President

Robert H. Dearborn

Council Action Summary

October 7, 2025: An ordinance was discussed and approved regarding use of electric bicycles (e-bikes), requiring operators to be 16 years of age in most cases. The regulations can be viewed at villageofwinnetka.org/ebike. A contract with RPG Energy Group for the design and installation of a Solar Photo Voltaic (PV) Array at the Village Yards was discussed and approved. A long-term planning discussion for power generation was held, with Council providing the direction to maintain steam generation through 2035. A special meeting was held consisting of a closed session to discuss security procedures and litigation pursuant to Section 2(c)(8) and 2(c)(11) of the Open Meetings Act.

October 14, 2025: A discussion of the former post office site (512 Chestnut Street) was held, providing an overview of the history of the site, the current plans for demolition of the building that housed the post office, and site restoration options. Council considered various project costs and provided direction to pursue additional design services for options for the site.

October 21, 2025: A proposed mixed-use development, Tower Court Condos, was discussed and public comment was heard. A presentation was given by the Environmental, Forestry, and Sustainability Commission on regulations regarding solar panels, and Council requested an ordinance be prepared for review at a future meeting which would make zoning changes to allow residential solar panels as a permitted accessory use, allow for building-mounted or ground-mounted solar panel installations, and meet additional safety requirements. A policy document regarding lakefront property guidelines was discussed and deferred for future review.

October 30, 2025: An all-day meeting was held to present the Village’s 2026 Annual Budget and Capital Improvement Plan. Each department overviewed its budget and major initiatives for the 2026 financial year. The 2026 Budget is discussed in further detail on page 5.

November 4, 2025: A plat of subdivision and variations from the Winnetka Zoning Ordinance were discussed and approved for 881 and 883 Private Road. A special use permit was discussed for Sit Still Kids Salon at 986 Green Bay Road. An extension agreement with Strand Associates, Inc. was discussed and approved for engineering design services for the conveyance portion of the Stormwater improvements Project. An agreement with Hey and Associates, Inc. for design services for the Spruce Street access point was discussed and approved. A closed session was held to discuss pending litigation, probable or imminent litigation pursuant to Section 2(c)(11) of the Open Meetings Act.

November 18, 2025: A public hearing on the 2026 Budget was held. Ordinances were introduced to enact a Home Rule Municipal Retailers’ Occupation Tax and a Home Rule Municipal Service Occupation Tax, adopt the budget, establish rates and fees related to utility services, amend service fees, levy taxes for the year 2025, and pay General Obligation Refunding Bonds. An ordinance to amend the Winnetka Zoning Ordinance to establish regulations for solar energy systems was discussed and approved. The special use permit for Sit Still Kids Salon was approved.

December 2, 2025: A discussion of the Streetscape Project planned for the Indian Hill business district, in partnership with the Village of Kenilworth, was held. As the project area is 70% in Kenilworth, the Council deferred consideration of policy direction until the Village of Kenilworth determines next steps. A Special Use Permit for a medical office was discussed and approved at 730 Elm Street. A variation from the Winnetka Zoning Ordinance was discussed and approved to allow for construction of an addition to an existing garage at 20 Fox Lane. A closed session was held to discuss collective bargaining, pending litigation, and review of closed session minutes pursuant to Sections 2(c)(2), 2(c)(11), and 2(c)(21) of the Open Meetings Act.

December 16, 2025: A contract with Teska Associates, Inc. for professional landscape and architectural design services was discussed and approved for the former Post Office site at 512 Chestnut Street. The 2026 Council study session tentative schedule of meeting topics was reviewed. A closed session was held to discuss specific personnel and pending litigation, pursuant to Sections 2(c)(1) and 2(c)(11) of the Open Meetings Act.

One Winnetka Construction Underway

Construction activity on the long anticipated One Winnetka mixed-use development at the southeast corner of Elm Street and Lincoln Avenue is progressing. General contractor, Walsh Construction, began site mobilization and demolition of the six existing buildings in late May and early June, respectively.

Since then, the structures and excavated soil have been removed and hauled off from the site. Additionally, underground utility connections have been made, the building foundation completed, and now precast concrete columns and planks are being installed as the structure rises above grade level.

Once finished, the 195,933 square-foot four-story mixed-use building will contain 59 rental apartments on floors two through four and 19,600 square feet of commercial space on the ground level. A restaurant from Ballyhoo Hospitality is planned within the corner commercial tenant space, while financial counseling office Charles Schwab and Winnetka Aesthetic Studio, a medical office, have been granted special use permits to locate in tenant spaces along the Elm Avenue frontage. The building will house 151 enclosed parking spaces between the ground and lower levels. Construction is anticipated to be completed by the end of 2026 with initial residential occupancy in January of 2027.

Willow Road Reconstruction Project Update

Beginning in late spring, the Village will begin the Willow Road Reconstruction Project—one of the most significant capital improvements planned for 2026 and an important component of the Stormwater Improvements project. This important investment will modernize critical infrastructure, improve safety and mobility, and support the long-term needs of the community.

The project includes the full reconstruction of Willow Road and major improvements at the intersection of Willow and Hibbard Roads. Once completed, the intersection will feature designated turn lanes and upgraded traffic signal operations, creating a more traditional and efficient traffic flow. These enhancements are expected to significantly reduce congestion during peak travel times and improve overall safety for drivers, pedestrians, and cyclists.

In addition to roadway and traffic improvements, the project will deliver essential underground infrastructure upgrades. These include the installation of new large stormwater box culverts to improve drainage and reduce flooding risk, new water mains and water services, a new sanitary sewer main, and a new water main bypass. Together, these improvements will strengthen the reliability and management of potable water service between the water plant and the underground storage tank west of Hibbard Road, helping ensure dependable service for years to come.

The Village recognizes that a project of this scale will cause temporary disruptions for nearby residents, schools, and local businesses. We are committed to minimizing impacts wherever possible through careful planning, clear communication, and close coordination with all affected stakeholders. Regular updates will be provided so the community knows what to expect as work progresses.

In coordination with the state, the Village anticipates awarding the construction contract in May 2026. While construction will require patience and cooperation, the long-term benefits—safer travel, reduced congestion, improved stormwater management, and more resilient utilities—will be lasting and meaningful for the entire community.

Winnetka Utility Rebate Program

Introducing new clean energy and energy efficiency utility rebates for residents in 2026.

To bolster the Village’s commitment to sustainability and implementation of the upcoming Climate Action Plan, the 2026 budget allocated additional funds to incentivize expanded energy efficiency, renewable energy, and electrification investments. New solar energy systems, EV chargers, certain ENERGY STAR appliances, and air conditioner condensers are now eligible. The Village is considering adding more categories to this list later in the year. To apply for a rebate, complete the form on villageofwinnetka.org/rebate.

Expanded Utility Rebates for 2026

	Eligibility and Rebate Value
Solar Distributed Generation (DG)	Residential - \$300/kW up to 10kW of capacity = \$3,000 Cap Commercial - \$250/kW AC up to 10kW of capacity = \$2,500 Cap
EV Charging	All EV charger incentive rebates are up to \$500 and limited to 50% of total costs (charger purchase price and installation) excluding tax, discounts, permit costs, and ineligible costs.
AC Condenser Replacement Rebates	Incentives for qualifying central air conditioning (AC) units: •15 SEER or 14.3 SEER2 (\$300) •16 SEER or 15.3 SEER2 (\$400) •18 SEER or 17.2 SEER2 (\$600)
Appliance Rebates	•ENERGY STAR Electric heat pump water heaters (\$500) •ENERGY STAR Electric heat pump clothes dryers or combination washer/dryers (\$250) •Induction cooktops/ranges (\$150) •Autonomous/robot electric lawn mowers (\$200)
Smart Thermostat Rebates	Up to two new smart thermostats. Maximum rebate amount is \$100 per unit (\$200 total).

Chase Bank Building Nearing Completion

The exterior of the new three-story Chase Bank building at the northwest corner of Elm Street and Green Bay Road is nearly complete with windows installed and the majority of the masonry work finished. Retail banking services will be offered on the street level, wealth management services on the upper levels, 7 parking spaces on the surface lot and 24 parking spaces in the lower level of the building. The adjacent alley is fully open, and interior work has been ongoing with a scheduled completion in summer of 2026 following streetscape improvements.

2026 Budget: Strategic Community Investment

Winnetka’s budget, adopted each year by the Village Council, is the official financial plan for the Village’s operating departments. The budget also presents information related to Winnetka’s debt positions, pensions, and planned capital improvements. The Village follows a calendar-based fiscal year.

On October 30, 2025, Village Council held an all-day public budget review meeting, where Village staff presented a formal review of the 2026 Annual Budget and Capital Improvement Plan, with each department presenting on their functional areas of operation.

Below is a snapshot of the key metrics related to the 2026 Annual Budget:

- The 2026 Annual Budget totals \$116,208,338, of which \$39,478,315 is dedicated towards capital infrastructure.
- The General Fund operating budget, the Village’s main operating fund, totals \$41,544,006; a proposed increase of 8.22% compared to 2025 due to increased capital spending.
- The 2025 tax levy will generate \$16,682,135 for village operations. The average increase to existing residents is an inflationary adjustment of 1.45%.
- The proposed 2025 tax levy is less than the tax cap limit (PTELL). Since 2005, the Village has been cumulatively \$26.8 million under the tax cap.
- The 2026 Budget’s impact to a typical Winnetka household is \$449 a year or \$37.42 monthly driven by increases in the utility funds as follows:
 - Electric increase: 6.5%
 - Water and Sanitary Sewer increase: 8.0%
 - Refuse increase: 6.5%
 - Stormwater sewer increase: 5.0%.

The rate increases will support capital improvements.

- The 2026 Village Capital Plan totals \$39,478,315, with significant funding dedicated towards roadway improvements, water mains (including lead service line replacement), stormwater improvements, downtown revitalization, improvements to the Village’s electric system and green infrastructure. On November 18, 2025, the Village Council held a public hearing on the 2026 budget and introduced the budget, the 2025 property tax Levy, and the 2026 rate resolutions. Then, at the December 2 Council Meeting, the 2026 Budget was formally adopted. To see the current budget, visit the Fiscal Transparency page on the Village’s website.

Message from the Fire Chief

Fire Safety

The Winnetka Fire Department wants you to 'keep safe while you keep warm' this winter season. More home fires occur in the winter than any other season, with heating equipment being one of the leading causes of home fire deaths.

Here are some tips from the Winnetka Fire Department to stay safe while you stay warm:

- Keep a three-foot safety zone around heating equipment. Ensure children, pets, and anything that can burn remain outside the safety zone.
- When selecting a portable heater, purchase one that has a seal from a qualified testing laboratory, is equipped with a thermostat, and has tip-over/overheat protection.
- Have a qualified professional install stationary heating equipment, like water heaters or central heating equipment, according to code and manufacturer instructions. Have the equipment regularly inspected and serviced by qualified professionals.
- Always plug space heaters directly into an outlet and check to ensure the cord isn't damaged.
- Keep space heaters out of the way of foot traffic and never block an exit.
- Remember to turn portable heaters off when leaving the room or going to bed.
- Never use a gas range or oven to heat your home. This can cause a buildup of carbon monoxide inside your residence.

Sign up for Smart911

The Village uses Smart911's system to distribute alerts to residents in emergencies. If you haven't signed up for Smart911, please do so today at Smart911.com. Smart911 requires that you keep your profile updated and reminds you with an email every six months to verify that your emergency information remains correct. Your account provides emergency responders with current information about your residence and medical information that would be relevant to your care. The service is kept secure via the highest security standards and your information is only available to emergency responders and the 911 dispatch system.

Winter Health Safety

The Winnetka Fire Department wants to remind you to take extra precautions when you mitigate the impact of winter weather. Did you know that the physical exertion of shoveling snow may lead to an increased risk of heart attack or sudden cardiac arrest? For most people, shoveling snow may not lead to health problems. But it's still important to know how the cold can affect your heart, especially if you have cardiovascular disease or other cardiac risk factors. Knowing your risk factors is an important step in understanding how to lower your risk.

Cardiovascular risk factors include:

- Sedentary lifestyle
- Obesity
- Being a current or former smoker
- Diabetes
- High cholesterol
- High blood pressure
- History of heart attack or stroke

The physical demand of shoveling snow can cause significant increases to your blood pressure and heart rate, especially when many unconsciously hold their breath when straining to lift a heavy shovelful of snow. Coupled with the exposure to cold air constricting blood vessels, the heart is being tasked with a greater workload in conditions designed to diminish its ability to function optimally.

Here are a few practical tips to keep in mind, especially if you have cardiac risk factors, to help make snow removal safer this winter season:

- Give yourself a break. Take frequent breaks during shoveling so you don't overstress your heart. Pay attention to how your body feels during those breaks.
- If possible, have someone else handle snow removal for you. If you must shovel snow yourself, start gradually and pace yourself. Ideally, push or sweep the snow rather than lifting and throwing it to lessen the exertion. If you are able, use an automated snow blower rather than shoveling.
- Don't drink alcohol before or immediately after shoveling. Alcohol may increase a person's sensation of warmth and may cause them to underestimate the extra strain their body is under in the cold.
- Consult your health care professional if you have a medical concern or question about exercising in cold weather, especially if it is a substantial increase over your usual physical activity level.
- Be aware of the dangers of hypothermia. To prevent hypothermia, dress in layers of warm clothing, which traps air between the layers forming a protective insulation. Wear a hat because much of your body's heat can be lost through your head. Be careful when the wind is blowing; wind increases the effects of cold on your body.
- Learn the heart attack warning signs and listen to your body, but remember this: even if you're not sure it's a heart attack, have it checked out. Minutes matter! Fast action can save lives. Don't wait to call 911.
- Learn CPR. Effective bystander CPR, provided immediately after sudden cardiac arrest, can double or triple a victim's chance of survival. Hands-only CPR makes it easier than ever to save a life. If an adult suddenly collapses, call 911 and begin pushing hard and fast in the middle of the victim's chest until help arrives. Visit villageofwinnetka.org/CPR to sign up for CPR/AED training and certification.

Message from the Police Chief

The Police Department is happy to share that we will be continuing our “Coffee and Conversations” program in 2026. This event will take place on the last Wednesday of every month from 9:30

AM to 10:30 AM, between April and October (weather permitting) at Hometown Coffee & Juice at 749 Elm Street on the northeast corner of Lincoln & Elm Streets. All are welcome to enjoy a free cup of coffee and speak with Police Department staff who will be available to answer questions in a relaxed atmosphere. We look forward to seeing you there.

Snow and Ice Operations

Snow and ice operations used to be largely “one size fits all.” When a storm came, crews responded using plowing and salting until the pavement was wet. As time has passed and technology has improved, the techniques utilized have become more advanced and scientific. Today’s snow operations in the Village still utilize plowing and salting. However, they are much more strategic and scientific with the goal of keeping roads safe and passable while minimizing the use of de-icing materials to keep unnecessary salt out of the environment.

Regular salt (the same as table salt) is an economical and practical solution for snow mitigation. It lowers the freezing point of water and helps prevent ice from bonding to pavement. However, it can be both harmful to the environment and corrosive to streets themselves, so methods to reduce its use have been in development for a number of years.

Today, the Village Public Works Department uses a few different methods for snow and ice control. First, trucks are outfitted with spreaders, which limit the amount of material used per lane mile. Second, the salt used is “pre-wet” with liquids designed to increase their effectiveness (including salt brine and beet juice). This improves the effectiveness of salt and makes it heavier and less likely to “spray” outside of the roadway.

Salt use is tailored to the situation. A storm occurring primarily at night with temperatures dropping warrants more salt than a similar storm during the day with sunlight occurring right afterward.

In 2024, the Village added three “microweather” stations to its snow monitoring capabilities. These measure the specific conditions near the lake, in the downtown areas and on the west side of the Village. These are excellent at monitoring live conditions and for predicting road temperatures, which are frequently higher than air temperatures. These tools allow us to better anticipate how much salt will be needed and where.

For more information on village snow operations, please visit the Village’s website at villageofwinnetka.org/snow.

Winter storms are sometimes accompanied by parking restrictions, as parking on Village streets is prohibited during a snow emergency. The Winnetka Village Code indicates that a snow emergency exists when the Director of Public Works has determined that two or more inches of snow have fallen within a 24-hour period or that two or more inches of snow remains on any roadway in the Village. Parking bans will remain in effect until snow has been cleared from streets. Please do your part to ensure vehicles are not parked on the street during a snow emergency, which will help our Public Works Department properly plow our streets. Village parking lots have alternate parking restrictions between 12 AM – 6 AM on even/odd days during a snow emergency. Vehicles on village streets during snow emergencies may be relocated and any violation of snow emergency parking restrictions is subject to a \$150 fine. Learn more about these restrictions at villageofwinnetka.org/snow. If you suspect your vehicle has been towed or relocated after a snow emergency parking ban, please call our department’s non-emergency number: 847-501-6034. The Village will email residents and post information on our website when a snow emergency occurs. Please take extra care to drive safely during snowy or icy conditions, and we wish you a safe and enjoyable winter.

If you plan to be away from your home for any extended period, residents are encouraged to make use of the Police Department’s House Watch program. You can submit your vacation requests by visiting villageofwinnetka.org/vacation.

Sidewalk Shoveling

After larger snows, typically beyond 3 to 4 inches, the Village plows snow from residential sidewalks. In order to prevent ice buildup on the sidewalks, residents should remove snow from the sidewalks in front of their homes after slushy events or smaller snowstorms. This will go a long way toward helping keep our sidewalks free from ice and easier for pedestrians to navigate.

If you have questions, please call 847-716-3568.

2026 Green Award Nominations

Residents and businesses are invited to submit nominations for the annual Green Awards Program. The purpose of Green Awards is to recognize properties and households within Winnetka that demonstrate exceptional commitment to sustainable and environmentally-friendly practices. If you or someone you know has recently taken action to eliminate waste, introduce native plants, reduce fossil fuel dependency, save water and energy, or adopt other sustainable practices, consider applying for a 2026 Green Award.

The form will be available at villageofwinnetka.org/green between February 1 and March 10 and winners will be announced at a Village Council meeting in April.

Flood Protection Assistance

The Village of Winnetka is a designated National Floodplain Insurance Program (NFIP) community. The Engineering Department and Sewer Division of the Public Works Department provide the community with one-on-one advice about property protection, with respect to drainage issues, flooding, sanitary sewer back-up, sewer management and maintenance issues, and any available funding for making necessary repairs.

If you have any questions regarding drainage issues, flooding, floodplain, sanitary sewer back-up, sewer management or sewer maintenance, or would like to schedule an on-site visit, please contact Village staff for assistance:

Drainage and Flooding Issues; Floodplain Questions:

James Bernahl, Director of Engineering,
jbernahl@winnetka.org, 847-716-3261

Obaid Khalid, Assistant Village Engineer and Stormwater Manager,
okhalid@winnetka.org, 847-716-3532

Sewer Maintenance, Sanitary Sewer Back-Up, Sewer Management:

Zack Svacina, Sewer Foreperson,
Public Works, zsvacina@winnetka.org, 847-716-3273

Protect Your Property from Flood Damage

Different measures are appropriate for different flood hazards, building types, and building conditions. All methods must comply with the Village's Flood Hazard Protection Ordinance and applicable building codes. Please always check to see what permits are necessary from the Village. The protection of your home and property could include the following methods:

- Elevate the building above the Flood Protection Elevation, which is 2' above the Base Flood Elevation.
- Elevate damage-prone components, such as the furnace, air conditioning units, or other attendant utilities.
- Raise window wells and exterior stair wells to provide a barrier from overland flooding and keep well drains free of debris.
- Dry flood-proof the building so that water cannot get into it.
- Wet flood-proof portions of the building so that water won't cause damage.
- Construct a berm or redirect drainage away from the building.
- Notify the Village of any observed maintenance issues relating to streams, ditches, and public storm drains; and maintain all privately owned storm drains so that debris does not obstruct them.
- Install a sanitary sewer back-up protection system.

Online Payments

Residents can renew their vehicle stickers, commuter parking passes, and dog licenses online. Purchases can be made by a major credit card and will be shipped after the purchase is complete. New residents should call the Finance Department at 847-501-6000 to request an application via mail. As required by Village Code, residents purchasing dog licenses are required to provide a copy of their pet's rabies certificate during both the online and in-person process. Residents can also pay utility bills and parking tickets online with a credit card. Utility customers will be required to create a user profile and can then make a one-time payment or enroll for automatic recurring credit card payments. Use the payments button on the Village's website (villageofwinnetka.org) to get started.

Residential Composting Drop-Off Available

Lakeshore Recycling Systems and the Village of Winnetka are pleased to offer drop-off sites where residents may discard food scraps and organics collected at home in carts located throughout the Village. Residents may drop off food scraps and organics in containers located at Carleton Washburne School, Greeley School, Hubbard Woods Elementary School, New Trier High School, Elm Street Station, and Winnetka Congregational Church.

Compost must be placed loose or within compostable bags. The use of plastic bags will result in the compost being directed to traditional waste streams. View details at villageofwinnetka.org/composting.

Year-Round Holiday Light Recycling

Recycle old holiday lights with the Village's year-round light recycling program. All types of holiday lights and cords are accepted for recycling at the Public Works Yards, 1390 Willow Road, weekdays from 7:30 AM to 4 PM.

The Village cannot accept garland, live greens, wreaths, or other non-recyclable items. If you have questions about the program, please call 847-716-3568.
