

PROJECT INTRODUCTION + EXISTING CONDITIONS MAP

PROJECT INTRODUCTION:

This project evaluates the utilization of the public right-of-way in Hubbard Woods, including the roadways, sidewalks, plantings, and green spaces controlled by the Villages and/or Illinois Department of Transportation (IDOT).

The planning process is designed to offer viable enhancement options that improve pedestrian safety, on-street and off-street parking, lighting, pavement, site furnishings, wayfinding signage, trees, plantings, and outdoor seating and dining.

This study will result in a Hubbard Woods Business District Streetscape Concept Design Plan report paired with concept plans to help guide future Village discussions and decision-making about specific streetscape improvements in the district.

ANTICIPATED TIMELINE

COMMUNITY OUTREACH + PRELIMINARY CONCEPTS	2023-2024
IDOT COORDINATION	2024-2025
ENGINEERING + FINAL DESIGN*	TBD
CONSTRUCTION*	TBD

* Final design, engineering + construction is dependent on coordination with IDOT and funding availability
