

Village of Winnetka
Department of Community Development

**Construction and Demolition Debris Recycling
Compliance Report**

Step 2

Check one of the following that describes your project:

- Construction Renovation Demolition

Contractor Information:

Contractor Name

Phone number

Street Address

State

Zip

Construction/Demolition Site Information:

Address of Project Site

Building/Demolition Permit Number

Actual Date Project Started

Size of Project (square footage of all floors)

Project Manager's Name & Phone #

Property Owner's Name & Phone #

Construction and Demolition Debris Weight Information

1. Actual Weight of all Construction and Demolition Debris produced on site:

Inert Debris _____ (concrete, brick, rock, etc.)

Non-inert Debris _____

2. Actual Weight of inert and other construction and demolition debris that was Recycled: _____

3. Specify method used to determine the weight: _____

4. Attach original receipts from vendors and facilities which collected or received debris indicating actual weights received by each.

Compliance Report shall be submitted no less than five (5) business days prior to the scheduled date for the final inspections of the covered project.

Village of Winnetka
Department of Community Development

Step 2

List of all Construction and Demolition Debris Produced on Site

<u>Construction and Demolition Debris Type</u>	<u>On Site Weight of Reused</u>	<u>Off Site Weight of Reused/Recycled</u>	<u>Off Site Weight of Disposed</u>
Bricks			
Concrete			
Clean Wood			
Acoustical tile			
Gypsum Wallboard			
Cardboard			
Metal			
Plastic			
Glass			
Carpet			
Insulation			
Other (please specify):			

Subtotals: _____ **

Total of all construction and demolition debris produced on site (sum of the three columns above): _____

***If weight measurements are not available, convert volume to weight and retain documentation to support the accuracy of the converted measurements.**

****Recycling Vendor/Facility receipts must be attached to account for the amount of construction and demolition debris recycled or disposed of off site. To account for construction and demolition debris reused on or off site the contractor must provide supporting documentation upon request by the Department.**

Village of Winnetka
Department of Community Development

Step 2

Calculation of Recycling Percentage

- A. Total weight of Recycled/Reused construction and demolition debris _____.
(from line 2 on page 1.)
- B. Total weight of construction and demolition debris _____.
(from line 1 on page 1.)
- C. Percent of construction and demolition debris Recycled _____.
(divide "A" by "B" and multiply by 100.)

Example:

- A. Total weight of Recycled/Reused construction and demolition debris 2,075.
- B. Total weight of construction and demolition debris 5,700.

a. $2,075 / 5,700 = 0.36$
b. $0.36 \times 100 = 36$

- C. Percent of construction and demolition debris Recycled 36 percent.

- D. Percent required to be Recycled (for 2012)..... 75 percent.

If Line "C" is less than 75%, \$2,000 construction and demolition debris recycling deposit will be confiscated.
