

CHANGES TO BEST MANAGEMENT PRACTICES

The following information describes the changes that have been made with respect to our best management practices. Many of the best management practices that were proposed during the initial 5 year phase of the permit have now been incorporated as a qualifying local program and will be monitored, annually, without change in procedure.

Two BMP's have been modified to delete certain sections of their scope:

BMP A.1 Distributed Material: Education/Outreach for Homeowners and Commercial Activities and **B.7 Other Public Involvement** were originally designed to distribute information and perform a response survey with the public upon receipt of this information. Over the initial 5 year period, the response rates were tracked and noted as declining from 39% in Year 2, down to 5.5% in Year 5. Due to the lack of response, the survey portion of this BMP was eliminated, though the information is continually available to all residents and business owners in the Village of Winnetka.

BMP A.3 Public Service Announcement: This BMP was developed to publish information in the local newspaper and/or Village newsletter and/or broadcast on the local cable network. The local cable network is no longer able to broadcast this information. However, the publication of information will continue through the remaining available avenues.
